MEMORANDUM: To Santa Clara Water Users

Subject: Santa Clara Creek Water Distribution

Compiled by Donald C. Norseth and Gerald W. Stoker

*File  
AD  
6-15-66*

\*\*\*\*\*

A meeting was held June 9, 1966 at the St. George Courthouse with a group of the Santa Clara Creek Water Users representing most of the system.

The following agreement was reached for distribution purposes, without prejudice, on a temporary basis for the years 1966, 1967, and 1968. The water commissioner is to report annually as to what he finds in the handling of the Santa Clara System under this agreement.

The 50% cut was discussed and adopted as follows:

- I. Division A shall be the upper stretch of the Santa Clara Creek from and including the Indian Diversion to the upper reaches of the creek.
- II. Division B shall include all diversions below this point.
- III. The water shall be distributed in accordance with the Santa Clara Decree modified by the 50% cut as follows:

*Where does  
A end? and B begin?  
A B*

*11*

- A. When the water supply drops so that the diversions in Division B have only 75% of their normal rights, then the water commissioner shall cut all rights in Division A to 50% of their normal rights.
- B. Then he will make no further cut in diversions in this division.
- C. Division B Diversions will be regulated as the water supply in the creek dictates.

The water commissioner is to make a report of the time of the 50% cut and record his experience and problems in handling the water under this agreement. This data shall be included in his annual report that all water users can readily see the result.

This memorandum is being supplied to Charles Hafen for dispersion to those who attended the meeting and any other interested parties.

Your comments on any needed corrections will be appreciated.
